Page 2

Here is **Page 2 — Agency Alignment Matrix** fully written, structured, and formatted for **federal submission standards** (NIH, NSF, DoD, DHS, DOE).

No PDF, no links — clean text you can **copy + paste** straight into your Federal Capability Statement.

PAGE 2 — AGENCY ALIGNMENT MATRIX

How NI-AI aligns with federal missions, priorities, and funding tracks

NI-AI Federal Agency Alignment Matrix

Agency Mission Priority How NI-AI Directly Aligns Relevant Funding Tracks

NIH – National Institutes of Health Advancing neurodivergent support, mental health, cognitive research, adaptive learning systems • NI-AI's **Neuro-Adaptive Interaction Engine** supports ASD, ADHD, trauma, sensory-regulation, and cognitive load reduction. • EchoAuth enables **stress-aware authentication** for healthcare and caregivers. • NI-AI assists cognitive rehabilitation and emotional stabilization. • NIMH grants • NINDS • NICHD (Autism / Development) • SBIR/STTR

NSF – National Science Foundation Foundational AI research, cognitive systems, human-AI interaction, secure authentication • NI-AI demonstrates a **new AI architecture (Coherence Engine)** — qualifies as frontier scientific innovation. • Thread-Linking + Emotional-State Engines introduce **new theoretical AI models**. • CISE Directorate • Secure & Trustworthy Cyberspace • Emerging Frontiers in Research & Innovation • NSF STTR/SBIR

DoD – Department of Defense AI stabilization, soldier cognitive load reduction, secure identity, cross-device intelligence • EchoAuth provides **adaptive identity verification** for secure systems. • NI-AI reduces cognitive load in high-pressure decision systems. • Stability Kernel eliminates hallucination — critical for mission reliability. • DARPA AI Next • DIU Commercial Solutions • Navy/Army STTR • AFWERX

DHS – Department of Homeland Security Identity protection, cybersecurity, threat recognition, resilient systems • NI-AI protects systems through **emotion- & behavior-aware authentication**. • Prevents hacking via behavioral mismatch detection. • Useful in TSA/CBP identity and digital border systems. • DHS S&T Directorate • Cybersecurity Innovation Programs

DOE – Department of Energy Advanced computing, secure infrastructure, AI for national labs • NI-AI Coherence Engine improves stability for **high-performance computing**. • Useful in national lab identity/security layers. • Supports energy grid control systems requiring precise, stable AI. • DOE Office of Science • ARPA-E • Energy Infrastructure Security

One-Paragraph Federal Justification

NI-AI directly supports federal missions by delivering a first-of-its-kind **coherence-based AI architecture**, emotional-state intelligence, adaptive authentication (EchoAuth), and neuro-supportive modeling. These capabilities address urgent federal needs in **healthcare, cybersecurity, national defense, cognitive support, identity verification, and resilient AI infrastructure**, making NI-AI applicable across **NIH, NSF, DoD, DHS, and DOE**.

Your Next Step

If you want the next page:

 **"Proceed — Page 3 (Federal Use Cases)"**

or you can choose a specific agency:

 **"Proceed — NIH Use Case Page"**

 **"Proceed — NSF Use Case Page"**

"Proceed — DoD Use Case Page"

Just tell me how you want to continue.
